

PEYTON ESTEP

Parma, OH | (440) 482 9819 | pestep09@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Denison University | Granville, OH
Bachelor of Arts - Data Analytics, Psychology Minor

Graduating May 2026
Current GPA: 3.9

RELEVANT SKILLS

Coding Languages: Python (Pandas, Matplotlib, Plotly, Gurobi, NumPy, Scikit-Learn, Seaborn), R (dplyr, ggplot2, tidyverse), SQL (Snowflake, PostgreSQL), SPSS

Data Engineering & BI: dbt (Data Build Tool), Snowflake, ETL/ELT Pipelines, Snowsight Dashboards, Git

Statistical Analysis: Hypothesis Testing, Regression Analysis, Correlation Analysis, Optimization/Linear Programming, Ordinal Logistic Regression, Marginal Effects

Certifications: CITI

WORK EXPERIENCE

Admissions Associate - Cleveland Metroparks Zoo | Cleveland, OH

May 2024 – Present

- Operated high-volume digital ticketing and scanning systems, ensuring accurate and efficient guest entry.
- Resolved real-time ticketing and system issues, improving throughput and guest experience.

Research Assistant - Denison University | Granville, OH

September 2024 - December 2024

- Analyzed 400K+ patient records to identify opioid (fentanyl) prescription trends across chronic conditions using regression, chi-square, and time series methods.
- Processed and modeled large-scale healthcare datasets using R (tidyverse, data.table, lubridate, lme4, broom, ggvenn) for statistical analysis and visualization.

PROJECTS

AI Diagnostic Bias Audit

January 2026 - May 2026

- Designed a 3,000-trial experimental study using the OpenAI API to analyze bias in mental health AI responses.
- Performed non-parametric statistical testing (Kruskal-Wallis, Tukey HSD) and Ordinal Logistic Regression to quantify how diagnostic labels influence AI safety outcomes.
- Automated text classification and feature extraction using Python to identify systemic “Instructional Cliffs” in high-risk prompts.

Urban Walkability and Restaurant Longevity

September 2025 - December 2025

- Built multivariate regression models and processed spatial data (Census TIGER/Line, Walk Score API) to identify predictors of restaurant longevity.
- Applied Wilcoxon and Kolmogorov-Smirnov tests to compare chain vs. independent distributions.
- Found city-level factors explained ~7% of variance, with minimal walkability impact (+0.087 years per Walk Score point)

Urban Forestry Optimization Model | Granville, OH

October 2025 - December 2025

- Developed a Mixed-Integer Linear Program (MILP) in Python (Gurobi) to optimize allocation of an urban forestry budget across 800+ Chicago census tracts.
- Integrated Census, Urban Heat Island (UHI), and City Health data to weight air quality, heat mitigation, and equity under land and budget constraints.

ON-CAMPUS LEADERSHIP AND INVOLVEMENT

DKDG - Denison Kpop Dance Group

January 2023 - Present

Vice President June 2025 - Present

Duwop - Denison's Coed A Cappella Group

September 2023 - Present
